DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches a charging member being contacted with an image bearing member comprising a resistance layer having an ionic electrical conductivity and includes a foamed elastic member having the following relationships:
$$B \leq (5/3) \times A - 0.3, \text{ and}$$
$$B \leq 0.6, \text{ wherein } A \text{ represent a surface bubble-containing density measured, in a state that air bubbles are attached to the surface of the resistance layer, by immersion method according to JIS Z 8807; and } B \text{ represents a surface bubble-deaerated density measured, in a state that the air bubbles are removed from the surface of the resistance layer, by immersion method according to JIS Z 8807.}$$

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Onuki et al, Itoh et al, Naoi et al, and Harashima et al teach other structures of contact charging roller being used for charging the image-bearing member.
